Performance data shown represents past performance and is no guarantee of future results. Past performance is net of management fees and expenses and reflects reinvested dividends and distributions. Past performance reflects the beneficial effect of any expense waivers or reimbursements, without which returns would have been lower. Investment returns and principal value will fluctuate and when redeemed may be worth more or less than their original cost. Returns for periods less than one year are not annualized. Current performance may be higher or lower and is available through the most recent month end at [harborcapital.com](http://harborcapital.com) or by calling 800-422-1050.

Shares are bought and sold at market price not net asset value (NAV). Market price returns are based upon the closing composite market price and do not represent the returns you would receive if you traded shares at other times

### Health Care:

- The Harbor Health Care ETF has provided attractive value to investors over the most recent 3-year period. The fund ranks in the 21<sup>st</sup> percentile for returns, 20<sup>th</sup> for information ratio, and 6<sup>th</sup> percentile for batting average versus other Health peers.

## Rising U.S. Health Care Costs Require Innovation

Health Care service business models focused on lower cost of care represent a possible solution to rising Health Care costs.

### The Problem: Unsustainably rising health care costs<sup>1</sup>

**A Shift in Approach:** A focus on value-based approaches across the entire health care ecosystem could be needed<sup>2</sup>

## Potential Value-Based Health Care Benefits

### PATIENTS

Lower Costs & Better Outcomes

### PROVIDERS

Higher Patient Satisfaction Rates & Better Care Efficiencies

### PAYERS

Stronger Cost Controls & Reduced Risks

### SUPPLIERS

Alignment of Prices with Patient Outcomes

### SOCIETY

Reduced Healthcare Spending & Better Overall Health

# Important Information

**For use with institutions only, not for use with retail investors.**

**All investments involve risk including the possible loss of principal.** Unlike mutual funds, ETFs may trade at a premium or discount to their net asset value.

There is no guarantee that the investment objective of the Fund will be achieved. Stock markets are volatile and equity values can decline significantly in response to adverse issuer, political, regulatory, market and economic conditions. Since the Fund may hold foreign securities, it may be subject to greater risks than funds invested only in the U.S. These risks are more severe for securities of issuers in emerging market regions. Foreign currencies can decline in value and can adversely affect the dollar value of the fund. Since the Fund typically invests in a limited number of companies, an adverse event affecting a particular company may hurt the Fund's performance more than if it had invested in a larger number of companies. Authorized Participant Concentration/Trading Risk: Only authorized participants ("APs") may engage in creation or redemption transactions directly with the Fund. The Fund is classified as non-diversified, a non-diversified Fund may invest a greater percentage of its assets in securities of a single issuer, and/or invest in a relatively small number of issuers, it is more susceptible to risks associated with a single economic, political or regulatory occurrence than a more diversified portfolio. New Fund Risk: There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Board of Trustees may determine to liquidate the Fund. Small and Mid Cap Risk: The Fund's performance may be more volatile because it may invest in issuers that are smaller companies.

**Health Care Industry Risk:** Because the Fund seeks to invest all, or substantially all, of its assets in the health care industry, the value of its shares will depend on the general condition of the that industry. The health care industry may be affected by any number of factors, including, but not limited to, lapsing patent protection, industry innovation, extensive government regulation, restrictions on government reimbursement for medical expenses, research and development costs, limited product lines, product liability litigation, an increased emphasis on outpatient services, and competitive forces.

The Morningstar Rankings are based on total returns, with distributions reinvested and operating expenses deducted. Morningstar does not take into account sales charges and other classes may have different performance characteristics. Harbor Health Care ETF was ranked against Morningstar's Health category, monthly, in absolute ranks based on total returns: 106 out of 192 investments in the category for the 1-year period and 32 out of 184 investments in the category for the 3-year period as of 6/30/2026. Using the same category, Harbor Health Care ETF was ranked in standard deviation ranks: 77 out of 192 investments in the category for the 1-year period and 121 out of 184 investments in the category for the 3-year period as of 6/30/2026. Using the same category, Harbor Health Care ETF was ranked in beta ranks: 35 out of 192 investments in the category for the 1-year period and 148 out of 184 investments in the category for the 3-year period as of 6/30/2026. Using the same category, Harbor Health Care ETF was ranked in tracking error ranks: 182 out of 192 investments in the category for the 1-year period and 102 out of 184 investments in the category for the 3-year period as of 6/30/2026. Using the same category, Harbor Health Care ETF was ranked in information ratio ranks: 104 out of 192 investments in the category for the 1-year period and 29 out of 184 investments in the category for the 3-year period as of 6/30/2026. Using the same category, Harbor Health Care ETF was ranked batting average ranks: 68 out of 192 investments in the category for the 1-year period and 6 out of 184 investments in the category for the 3-year period as of 6/30/2026. The highest (or most favorable) percentile rank is 1 and the lowest (or least favorable) percentile rank is 100.

The **Russell 3000® Growth Health Care Index** is an unmanaged index generally representative of companies involved in medical services or health care in the Russell 3000 Index, which is comprised of the 3,000 largest U.S. companies as determined by total market capitalization. This unmanaged index does not reflect fees and expenses and is not available for direct investment. The Russell 3000® Growth Health Care Index and Russell® are trademarks of Frank Russell Company.

Standard deviation measures the dispersion of a dataset relative to its mean.

Beta is a measure of systematic risk, or the sensitivity of a fund to movements in the benchmark. A beta of 1 implies that the expected movement of a fund's return would match that of the benchmark used to measure beta.

Tracking Error is the standard deviation of a portfolio's relative return (relative to some benchmark). It measures the volatility of the return differences between the portfolio and the benchmark over time.

The Information Ratio (Info Ratio) of a manager series vs. a benchmark series is the quotient of the annualized excess return and the annualized standard deviation of excess return.

The Batting Average of the manager is the ratio between the number of periods where the manager outperforms a benchmark and the total number of periods.
