Harbor Short Term Treasury ETF

Fund Summary

Investment Objective

The Fund seeks to provide exposure, before fees and expenses, generally consistent with the price and yield performance of the 3-month U.S. Treasury bill market.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.10%
Distribution and Service (12b-1) Fees	None
Other Expenses ^{1,2}	0.00%
Total Annual Fund Operating Expenses	0.10%

¹ Pursuant to the Investment Advisory Agreement, the Advisor pays all of the operating expenses of the Fund, except for (i) the fee payment under the Investment Advisory Agreement; (ii) payments under the Fund's 12b-1 plan (if any); (iii) the costs of borrowing, including interest and dividend expenses; (iv) taxes and governmental fees; (v) acquired fund fees and expenses; (vi) brokers' commissions and any other transaction-related expenses and fees arising out of transactions effected on behalf of the Fund; (vii) costs of holding shareholder meetings; and (viii) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund's business.

² "Other Expenses" are estimated for the current fiscal year.

Expense Example

This Expense Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other exchange-traded funds. The Expense Example assumes that you invest \$10,000 in the Fund for the time periods indicated. The Expense Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, under these assumptions, your costs would be:

One Year	Three Years
\$10	\$32

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when shares of the Fund are held in a taxable account. These costs, which are not reflected in the Annual Fund Operating Expenses or in the Expense Example, do affect the Fund's performance. The Fund had not commenced operations as of the date of this Prospectus and no portfolio turnover rate existed at the time of this publication.

Principal Investment Strategy

Under normal circumstances, the Fund invests at least 80% of its net assets, plus borrowings for investment purposes, in U.S. Treasury bills. Under normal circumstances, the Fund expects to maintain a dollar-weighted average portfolio maturity of

approximately 90 days or less although the Fund's dollar-weighted average portfolio maturity may modestly exceed 90 days from time to time due to U.S. Treasury auction schedules, settlement timing, weekends, holidays, market conventions, fund flows, or other portfolio management considerations.

U.S. Treasury bills are securities with maturities of one year or less issued by the U.S. Department of the Treasury and backed by the full faith and credit of the U.S. Government. U.S. Treasury bills are sold at a discount to their face value, do not pay periodic interest, and mature at face value.

The Fund may invest up to 20% of its total assets in other instruments intended to help the Fund pursue its investment objective, manage liquidity, facilitate creations and redemptions, reduce transaction costs, manage collateral, or seek additional income. Such instruments may include cash, cash equivalents, repurchase agreements, reverse repurchase agreements, money market funds, U.S. Treasury floating rate notes, other short-term U.S. Treasury or U.S. government securities, and shares of affiliated or unaffiliated investment companies, including exchange-traded funds registered under the Investment Company Act of 1940, as amended, that invest primarily in Fund-eligible investments.

The Fund may lend portfolio securities to seek additional income. These loans will be secured by collateral, which may include cash, U.S. government securities, irrevocable letters of credit, or other collateral permitted by applicable law, maintained in an amount at least equal to 100% of the market value, determined daily, of the loaned securities. Cash collateral received in connection with securities lending may be invested in short-term investments, including money market funds, repurchase agreements, reverse repurchase agreements, or other high-quality short-term instruments. Any reverse repurchase agreements entered into by the Fund will not exceed one-third of the Fund's total assets, including the amount borrowed.

The Fund is not a money market fund and does not seek to maintain a stable net asset value of \$1.00 per share.

The Fund may at times engage in active and frequent trading to achieve its principal investment strategies.

Principal Risks

There is no guarantee that the investment objective of the Fund will be achieved. Fixed income securities fluctuate in price in response to various factors, including changes in interest rates, changes in market conditions and issuer-specific events, and the value of your investment in the Fund may go down. This means that you could lose money on your investment in the Fund or the Fund may not perform as well as other possible investments. Principal risks impacting the Fund (in alphabetical order after the first six risks) include:

U.S. Treasury Obligations Risk: U.S. Treasury obligations, such as U.S. Treasury bills, are subject to fluctuations in interest rates, which may cause their market value to vary, and may provide lower returns than other securities. In addition, changes in economic conditions, market perceptions, or the financial condition or credit rating of the U.S. government may cause the value of such obligations to decline in value. Although backed by the full faith and credit of the U.S. government, these securities remain subject to market and credit risk.

Credit Risk: The issuer or guarantor of a security owned by the Fund could default on its obligation to pay principal or interest or its credit rating could be downgraded.

Fund Summary

HARBOR SHORT TERM TREASURY ETF

Inflation Risk: As inflation rises, the value of assets of or income, from the Fund's investments may be worth less, as inflation decreases the value of payments at future dates. As a result, the real value of the Fund's portfolio could decline.

Interest Rate Risk: As interest rates rise, the values of fixed income securities held by the Fund are likely to decrease and reduce the value of the Fund's portfolio. Rising interest rates may lead to increased redemptions, increased volatility and decreased liquidity in the fixed income markets, making it more difficult for the Fund to sell its fixed income securities when the Advisor may wish to sell or must sell to meet redemptions. During periods when interest rates are low or there are negative interest rates, the Fund's yield (and total return) also may be low or the Fund may be unable to maintain positive returns or minimize the volatility of the Fund's net asset value per share. Changing interest rates may have unpredictable effects on the markets, may result in heightened market volatility and may detract from Fund performance. In addition, changes in monetary policy may exacerbate the risks associated with changing interest rates.

Market Risk: Securities markets are volatile and can decline significantly in response to adverse market, economic, political, regulatory or other developments, which may lower the value of securities held by the Fund, sometimes rapidly or unpredictably. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions, the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact the Fund and its investments.

Risks Associated with Exchange-Traded Funds: As an ETF, the Fund is subject to the following risks:

Authorized Participant Concentration/Trading Risk: Only authorized participants ("APs") may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as APs and such APs have no obligation to submit creation or redemption orders. Consequently, there is no assurance that APs will establish or maintain an active trading market for the shares. This risk may be heightened to the extent that securities held by the Fund are traded outside a collateralized settlement system. In that case, APs may be required to post collateral on certain trades on an agency basis (i.e., on behalf of other market participants), which only a limited number of APs may be able to do. In addition, to the extent that APs exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other AP is able to step forward to create or redeem Creation Units (as defined below), this may result in a significantly diminished trading market for shares, and shares may be more likely to trade at a premium or discount to the Fund's net asset value and to face trading halts and/or delisting. This risk may be heightened during periods of volatility or market disruptions.

Cash Transactions Risk: The Fund may effect some or all of its creations and redemptions for cash rather than in-kind. As a result, an investment in the Fund may be less tax-efficient than an investment in an ETF that effects all of its creations and redemptions in-kind. Because the Fund may effect redemptions for cash, it may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. A sale of portfolio securities may result in capital gains or losses and may also result in higher brokerage costs. To the extent costs are not offset by transaction fees charged by the Fund to APs, the costs of cash transactions will be borne by the Fund.

Large Shareholder Risk: Certain large shareholders, including APs, may from time to time own a substantial amount of the Fund's shares. There is no requirement that these shareholders maintain their investment in the Fund. There is a risk that such large shareholders or that the Fund's shareholders generally may redeem all or a substantial portion of their investments in the Fund in a short period of time, which could have a significant negative impact on the Fund's NAV, liquidity, and brokerage costs. Large redemptions could also result in tax consequences to shareholders and impact the Fund's ability to implement its investment strategy. In addition, transactions by large shareholders may account for a large percentage of the trading volume on the listing exchange and may, therefore, have a material upward or downward effect on the market price of the shares.

Premium/Discount Risk: The market price of the Fund's shares will generally fluctuate in accordance with changes in the Fund's net asset value as well as the relative supply of and demand for shares on the Exchange. The Advisor cannot predict whether shares will trade below, at or above their net asset value because the shares trade on the Exchange at market prices and not at net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related, but not identical, to the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time. This may result in the Fund's shares trading significantly above (premium) or below (discount) the Fund's net asset value, which will be reflected in the intraday bid/ask spreads and/or the closing price of shares as compared to net asset value. During stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the market for the Fund's underlying portfolio holdings, which could in turn lead to differences between the market price of the Fund's shares and their net asset value.

High Portfolio Turnover Risk: Higher portfolio turnover may adversely affect Fund performance by increasing Fund transaction costs and may lead to the realization and distribution to shareholders of higher capital gains, which may increase a shareholder's tax liability.

Investment in Other Investment Companies Risk: Investments in other investment companies (including money market funds and ETFs) are subject to market and selection risk. In addition, if the Fund acquires shares of investment companies, shareholders bear both their proportionate share of expenses in the Fund and, indirectly, the expenses of the investment companies. The Fund's investment in shares of ETFs subjects it to the risks of owning the securities underlying the ETF, as well as the same structural risks faced by an investor purchasing shares of the Fund, including premium/discount risk and trading issues risk.

Issuer Risk: An adverse event affecting a particular issuer in which the Fund is invested, such as an unfavorable earnings report, may depress the value of that issuer's securities, sometimes rapidly or unpredictably.

New Fund Risk: There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Board of Trustees may determine to liquidate the Fund. The Board of Trustees may liquidate the Fund at any time in accordance with the Declaration of Trust and governing law. As a result, the timing of the Fund's liquidation may not be favorable.

Repurchase Agreements and Reverse Repurchase Agreements Risk: The Fund may enter into repurchase agreements and reverse repurchase agreements. The Fund may lose money if the counterparty to a repurchase agreement defaults on its obligation to repurchase the securities or if the value of the collateral declines.

Fund Summary

HARBOR SHORT TERM TREASURY ETF

Reverse repurchase agreements involve borrowing and expose the Fund to counterparty and leverage risk, which could increase the volatility of the Fund's returns. The Fund could lose money if the counterparty defaults on its obligations under a reverse repurchase agreement or if the value of the collateral, including investments made with the proceeds of the transaction, is less than the value of the securities or the repurchase price.

Securities Lending Risk: The Fund may engage in securities lending. Securities lending involves the risk that the Fund may lose money because the borrower of the loaned securities fails to return the securities in a timely manner or at all. The Fund could also lose money in the event of a decline in the value of collateral provided for loaned securities or a decline in the value of any investments made with cash collateral. These events could also trigger adverse tax consequences for the Fund.

Selection Risk: The Advisor potentially will be prevented from executing investment decisions at an advantageous time or price as a result of domestic or global market disruptions, particularly disruptions causing heightened market volatility and reduced market liquidity, as well as increased or changing regulations. Thus, investments that the Advisor believes represent an attractive opportunity or in which the Fund seeks to obtain exposure may be unavailable entirely or in the specific quantities or prices sought by the Advisor and the Fund may need to forgo the investment at the time.

U.S. Government Securities Risk: Securities issued or guaranteed by U.S. government agencies or government-sponsored entities may not be backed by the full faith and credit of the U.S. government. As a result, no assurance can be given that the U.S. government will provide financial support to these securities or issuers (such as securities issued by the Federal National Mortgage Association, or the Federal Home Loan Mortgage Corporation). Although certain government securities are backed by the full faith and credit of the U.S. government (such as securities issued by the Government National Mortgage Association), circumstances could arise that would delay or prevent the payment of interest or principal. It is possible that issuers of U.S. government securities will not have the funds to meet their payment obligations in the future and, in these circumstances, the Fund's returns may be adversely affected.

Performance

Because the Fund is newly organized, the Fund has no reportable performance history. Once the Fund has operated for at least one calendar year, a bar chart and performance table will be included in the prospectus to show the performance of the Fund. When such information is included, this section will provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance history from year to year and showing how the Fund's average annual total returns compare with those of a broad measure of market performance and an additional index. Please note that the Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. To obtain performance information, please visit the Fund's website at harborcapital.com or call 800-422-1050.

Portfolio Management

Investment Advisor

Harbor Capital Advisors, Inc.

Portfolio Managers

The portfolio managers are jointly and primarily responsible for the day-to-day investment decision making for the Fund.

Spenser P. Lerner, CFA, Head of Multi-Asset Solutions, Managing Director and Portfolio Manager of Harbor Capital Advisors, Inc., has managed the Fund since 2026.

Everett Lyons, Research Associate and Portfolio Manager of Harbor Capital Advisors, Inc., has managed the Fund since 2026.

Buying and Selling Fund Shares

Individual Fund shares may only be bought and sold in the secondary market through a broker or dealer at a market price. Shares of the Fund are listed and traded on an exchange at market price throughout the day rather than at NAV and may trade at a price greater than the Fund's NAV (premium) or less than the Fund's NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling Fund shares in the secondary market (the "bid-ask spread"). Recent information, including information regarding the Fund's NAV, market price, premiums and discounts, and bid-ask spread, is available at harborcapital.com.

Tax Information

Distributions you receive from the Fund are subject to federal income tax and may also be subject to state and local taxes. These distributions will generally be taxed as ordinary income, capital gains or some combination of both, unless you are investing through a tax-deferred retirement account, such as a 401(k) plan or individual retirement account. Investments in tax-deferred accounts may be subject to tax at ordinary income tax rates when they are withdrawn.

Payments to Broker-Dealers and Other Financial Intermediaries

The Advisor and/or its related companies have in the past and could in the future pay intermediaries, which may include banks, broker-dealers, or financial professionals, for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems and data or other services related to the sale of Fund shares and related services. These payments create a conflict of interest by influencing the broker-dealer or other intermediary and your sales representative to recommend the Fund over another investment. Ask your sales representative or visit your financial intermediary's website for more information.

Additional Information about the Fund's Investments

Investment Objective

The Fund seeks to provide exposure, before fees and expenses, generally consistent with the price and yield performance of the 3-month U.S. Treasury bill market. There can be no assurance that the Fund will be successful in achieving its investment objective. The Board of Trustees of Harbor ETF Trust (the "Board of Trustees") may change the Fund's investment objective without shareholder approval.

Principal Investment Strategies and Risks

The Fund's principal investment strategies and the principal associated risks are described in the *Fund Summary* section at the front of this Prospectus. More detailed descriptions of certain of the principal investments and risks are described below. The order of the below investments and risk factors does not indicate the significance of any particular investment or risk factor.

In addition to the investment strategies described in this Prospectus, the Fund may also make other types of investments, and, therefore, may be subject to other risks. For additional information about the Fund, its investments and related risks, please see the Fund's *Statement of Additional Information*.

80% INVESTMENT POLICY

The 80% investment policy of the Fund may be changed by the Fund upon 60 days' advance notice to shareholders.

ACTIVE MANAGEMENT

The Fund is actively managed by the Advisor. Actively managed portfolios are subject to management risk. In managing the Fund's portfolio, the Advisor applies investment techniques and risk analyses in making investment and asset allocation decisions, but there can be no guarantee that they will produce the desired results.

Temporary Defensive Positions

The Fund may take temporary defensive positions that are inconsistent with its normal investment policies and strategies—for instance, by allocating substantial assets to cash equivalent instruments or other less volatile instruments—in response to adverse market, economic, political, or other conditions. In doing so, the Fund may succeed in avoiding losses but may otherwise fail to achieve its investment objective.

EXCHANGE-TRADED FUND STRUCTURE

Shares can be purchased and redeemed directly from the Fund at NAV only by authorized participants in large increments (Creation Units). The Fund's shares are listed on an exchange and can be bought and sold in the secondary market at market prices. The market price of the Fund's shares, like other exchange-traded securities, may include a "bid-ask spread" (the difference between the price at which investors are willing to buy shares and the price at which investors are willing to sell shares). The Fund's market price per share will generally fluctuate with changes in the market value of the Fund's portfolio holdings and as a result of the supply and demand for shares of the Fund on the listing exchange.

There is no guarantee that the Fund will be able to attract market makers and authorized participants. Market makers and authorized participants are not obligated to make a market in the Fund's shares or to engage in purchase or redemption transactions. Decisions by market makers or authorized participants to reduce their role with respect to market making or creation and redemption activities during times of market stress, or a decline in the number of authorized participants due to decisions to exit the business, bankruptcy, or other factors, could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of the Fund's portfolio holdings and the market price of Fund shares. To the extent no other authorized participants are able to step forward to create or redeem, shares may trade at a discount to NAV and possibly face delisting. The authorized participant concentration risk may be heightened during market disruptions or periods of market volatility and in scenarios where authorized participants have limited or diminished access to the capital required to post collateral.

Investors may sustain losses if they pay more than the Fund's NAV per share when purchasing shares or receive less than the Fund's NAV per share when selling shares in the secondary market. In addition, trading of shares of the Fund in the secondary market may be halted, for example, due to activation of marketwide "circuit breakers." If trading halts or an unanticipated early closing of the listing exchange occurs, an investor may be unable to purchase or sell shares of the Fund. Shares of the Fund, similar to shares of other issuers listed on a stock exchange, may be sold short and are therefore also subject to the risk of increased volatility and price decreases associated with being sold short. There are various methods by which investors can purchase and sell shares and various orders that may be placed. Investors should consult their financial intermediary before purchasing or selling shares of the Fund.

Certain accounts or Advisor affiliates, including other funds advised by the Advisor or third parties, may from time to time own (beneficially or of record) or control a substantial amount of the Fund's shares, including through seed capital arrangements. Such shareholders such as those investing through one or more model portfolios, may at times be considered to control the Fund. Dispositions of a large number of shares of the Fund by these shareholders, including as a result of an asset allocation decision made by the Advisor, an affiliate of the Advisor or a third-party intermediary, may adversely affect the Fund's liquidity and net assets to the extent such transactions are executed directly with the Fund in the form

Additional Information about the Fund's Investments

of redemptions through an authorized participant, rather than executed in the secondary market. These redemptions may also force the Fund to sell securities, which may increase the Fund's brokerage costs. To the extent these large shareholders transact in shares of the Fund on the secondary market, such transactions may account for a large percentage of the trading volume on the listing exchange and may, therefore, have a material effect (upward or downward), on the market price of the Fund's shares.

FIXED INCOME SECURITIES

Fixed income securities represent a creditor relationship, or the right to receive specified payments of principal and interest from an issuer. Fixed income securities may have all types of interest rate payment and reset terms, including fixed rate, adjustable rate, inflation indexed, zero coupon, contingent, deferred, payment in-kind and auction rate features. The Fund principally invests in fixed income securities of the type and in the manner detailed in the *Fund Summary*.

Government Securities: "Government securities," as defined under the Investment Company Act of 1940 and interpreted, include securities issued or guaranteed by the United States or certain U.S. government agencies or instrumentalities. There are different types of government securities with different levels of credit risk, including the risk of default, depending on the nature of the particular government support for that security. For example, a U.S. government-sponsored entity, such as Federal National Mortgage Association or Federal Home Fixed income securities, as used, although chartered or sponsored by an Act of Congress, may issue securities that are neither insured nor guaranteed by the U.S. Treasury and are therefore riskier than those that are insured or guaranteed by the U.S. Treasury.

Risks Associated with Fixed Income Securities

Changing interest rates may have unpredictable effects on the markets, may result in heightened market volatility and may detract from Fund performance. In addition, changes in monetary policy may exacerbate the risks associated with changing interest rates. A sudden or unpredictable increase in interest rates may cause volatility in the market and may decrease liquidity in the fixed-income securities markets, making it harder for the Fund to sell its fixed-income investments at an advantageous time. Decreased market liquidity also may make it more difficult to value some or all of the Fund's fixed-income securities holdings. Certain countries have experienced negative interest rates on certain fixed-income securities. A low or negative interest rate environment may pose additional risks to the Fund because low or negative yields on the Fund's portfolio holdings may have an adverse impact on the Fund's ability to provide a positive yield to its shareholders, pay expenses out of Fund assets, or minimize the volatility of the Fund's net asset value per share. It is difficult to predict the magnitude, timing or direction of interest rate changes and the impact these changes will have on the Fund's investments and the markets where it trades. Securities issued by U.S. government agencies or government-sponsored enterprises may not be guaranteed by the U.S. Treasury.

NEW OR SMALLER FUND RISK

A new fund or a fund with fewer assets under management may be more significantly affected by purchases and redemptions of its Creation Units than a fund with relatively greater assets under management would be affected by purchases and redemptions of its shares. As compared to a larger fund, a new or smaller fund is more likely to sell a comparatively large portion of its portfolio to meet significant Creation Unit redemptions, or invest a comparatively large amount of cash to facilitate Creation Unit purchases, in each case when the fund otherwise would not seek to do so. Such transactions may cause funds to make investment decisions at inopportune times or prices or miss attractive investment opportunities. Such transactions may also accelerate the realization of taxable income if sales of securities result in gains and the fund redeems Creation Units for cash, or otherwise cause a fund to perform differently than intended. While such risks may apply to funds of any size, such risks are heightened in funds with fewer assets under management. In addition, new funds may not be able to fully implement their investment strategy immediately upon commencing investment operations, which could reduce investment performance.

NOT FDIC INSURED

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Fund shares will go up and down in price, meaning that you could lose money by investing in the Fund. Many factors influence the Fund's performance and the Fund's investment strategy may not produce the intended results.

OPERATIONAL RISKS

An investment in the Fund, like any fund, can involve operational risks arising from factors such as processing errors, inadequate or failed processes, failure in systems and technology, cybersecurity breaches, changes in personnel and errors caused by third-party service providers. These errors or failures as well as other technological issues may adversely affect the Fund's ability to calculate its net asset value in a timely manner, including over a potentially extended period, or may otherwise adversely affect the Fund and its shareholders. While the Fund seeks to minimize such events through controls and oversight, there may still be failures that could cause losses to the Fund. In addition, similar incidents affecting issuers of securities held by the Fund may negatively impact Fund performance.

Additional Information about the Fund's Investments

REPURCHASE AGREEMENTS AND REVERSE REPURCHASE AGREEMENTS

The Fund may enter into repurchase agreements and reverse repurchase agreements. The Fund may lose money if the counterparty to a repurchase agreement defaults on its obligation to repurchase the securities, if the value of the collateral declines, or if the Fund experiences delays in enforcing its rights against the collateral. Reverse repurchase agreements involve borrowing and may increase the volatility of the Fund's returns. Reverse repurchase agreements expose the Fund to counterparty risk, including the risk that the counterparty is unwilling or unable to meet its contractual obligations, and leverage risk, which could cause the Fund's returns to be more volatile than if leverage had not been used. The Fund could lose money if the counterparty defaults on its obligations under a reverse repurchase agreement or if the value of the collateral, including investments made with the proceeds of the transaction, is less than the value of the securities or the repurchase price. In addition, the Fund may incur losses if the return earned on the investment of the proceeds is less than the financing costs associated with the reverse repurchase agreement. Rising interest rates may increase financing costs and reduce or eliminate the benefits of leverage.

PORTFOLIO TURNOVER

The Fund expects to engage in frequent trading to achieve its principal investment strategy. Active and frequent trading in the Fund's portfolio may lead to the realization and distribution to shareholders of higher capital gains, which would increase the shareholders' tax liability. Frequent trading also increases transaction costs, which could detract from the Fund's performance. A portfolio turnover rate greater than 100% would indicate that the Fund sold and replaced the entire value of its securities holdings during the previous one-year period. In accordance with industry practice, derivative instruments and instruments with a maturity of one year or less at the time of acquisition are excluded from the calculation of the portfolio turnover rate.

Portfolio Holdings Disclosure Policy

A full list of Fund holdings will be provided on *harborcapital.com* on each business day prior to the opening of regular trading on the listing exchange.

Additional information about Harbor ETF Trust's portfolio holdings disclosure policy is available in the *Statement of Additional Information*.

The Advisor

Harbor Capital Advisors, Inc.

Harbor Capital Advisors, Inc. (“Harbor Capital” or the “Advisor”) is the investment adviser to Harbor ETF Trust. The Advisor, located at 111 South Wacker Drive, 34th Floor, Chicago, Illinois 60606-4302, is a wholly owned subsidiary of ORIX Corporation (“ORIX”), a global financial services company based in Tokyo, Japan. ORIX provides a range of financial services to corporate and retail customers around the world, including financing, leasing, real estate and investment banking services. The stock of ORIX trades publicly on both the New York (through American Depositary Receipts) and Tokyo Stock Exchanges.

The combined assets of Harbor ETF Trust and the other products managed by the Advisor were approximately \$69.1 billion as of June 30, 2026.

The Advisor may manage funds directly or employ a “manager-of-managers” approach in selecting and overseeing investment subadvisers (each, a “Subadvisor”). The Advisor makes day-to-day investment decisions with respect to each fund that it directly manages, such as the Fund. For funds that employ one or more discretionary Subadvisors, the Subadvisors are responsible for the day-to-day management of the fund assets allocated to them by the Advisor. For Harbor funds that employ one or more non-discretionary Subadvisors, the Advisor will make day-to-day investment decisions with respect to each such fund to implement model portfolios provided by non-discretionary Subadvisors.

Subject to the approval of the Board of Trustees, the Advisor establishes, and may modify whenever deemed appropriate, the investment strategy of the Fund. The Advisor also is responsible for overseeing each Subadvisor and recommending the selection, termination and replacement of Subadvisors.

The Advisor also:

- Seeks to ensure quality control in the Subadvisor’s investment process with the objective of adding value compared with returns of an appropriate risk and return benchmark or tracking an index, as applicable.
- Monitors and measures risk and return results against appropriate benchmarks and recommends whether the Subadvisor should be retained or changed.
- Focuses on cost control.

In order to more effectively manage the Fund, Harbor Funds and the Advisor have been granted an order from the Securities and Exchange Commission (“SEC”), which extends to Harbor ETF Trust, permitting the Advisor, subject to the approval of the Board of Trustees, to select Subadvisors not affiliated with the Advisor to serve as portfolio managers for the Harbor funds, and to enter into new subadvisory agreements and to materially modify existing subadvisory agreements with such unaffiliated subadvisors, all without obtaining shareholder approval.

In addition to its investment management services, the Advisor administers the business affairs of Harbor ETF Trust. Pursuant to the Investment Advisory Agreement between the Trust and the Advisor with respect to the Fund, and subject to the general supervision of the Board of Trustees, the Advisor provides or causes to be furnished, all supervisory and other services reasonably necessary for the operation of the Fund and also bears the costs of various third-party services required by the Fund, including administration, certain custody, audit, legal, transfer agency, and printing costs. The Advisor pays all other expenses of the Fund except for (i) the fee payment under the Investment Advisory Agreement; (ii) payments under the Fund’s 12b-1 plan (if any); (iii) the costs of borrowing, including interest and dividend expenses; (iv) taxes and governmental fees; (v) acquired fund fees and expenses; (vi) brokers’ commissions and any other transaction-related expenses and fees arising out of transactions effected on behalf of the Fund; (vii) costs of holding shareholder meetings; (viii) any gains or losses attributable to investments under a deferred compensation plan for Trustees who are not “interested persons” of the Trust; and (ix) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund’s business.

ANNUAL ADVISORY FEE RATES

(annual rate based on the Fund’s average net assets)

	Actual Advisory Fee Paid	Contractual Advisory Fee
Harbor Short Term Treasury ETF	N/A ¹	0.10%

¹ Has not commenced operations as of the date of this prospectus.

A discussion of the factors considered by the Board of Trustees when approving the investment advisory of the Fund will be available in the Fund’s first Form N-CSR filing following the Fund’s commencement of operations.

From time to time, the Advisor or its affiliates may invest “seed” capital in a fund, typically to enable a fund to commence investment operations and/or achieve sufficient scale. The Advisor and its affiliates may hedge such seed capital exposure by investing in derivatives or other instruments expected to produce offsetting exposure. Such hedging transactions, if any, would occur outside of a fund.

The Advisor

Portfolio Management

Harbor Short Term Treasury ETF

Harbor Capital Advisors, Inc., located at 111 S. Wacker Drive, 34th Floor, Chicago, IL 60606, serves as investment adviser to Harbor Short Term Treasury ETF. The portfolio managers are jointly responsible for the day-to-day investment decision making for the Fund.

PORTFOLIO MANAGER	SINCE	PROFESSIONAL EXPERIENCE
Spenser P. Lerner, CFA	2026	Mr. Lerner joined Harbor Capital in 2020 and is the Head of Multi-Asset Solutions, a Managing Director and Portfolio Manager. Prior to joining Harbor Capital, Mr. Lerner was a Vice President of Equity and Quantitative Investment Research and Equity Manager Research for JP Morgan Asset Management. Before that, he worked as a Research, Portfolio Management and Quantitative Investment Strategy Associate for JP Morgan Asset Management. Mr. Lerner began his investment career in 2009.
Everett Lyons	2026	Mr. Lyons joined Harbor Capital in 2025 and currently serves as a Research Associate and Portfolio Manager. Prior to joining Harbor, Mr. Lyons was a member of PNC Bank's Capital Markets Group on the FX Sales and Trading desk. Mr. Lyons holds a Master of Science in Finance from the University of Notre Dame Mendoza College of Business. Mr. Lyons began his investment career in 2023.

The *Statement of Additional Information* provides additional information about each portfolio manager's compensation, other accounts managed by each portfolio manager and each portfolio manager's ownership of shares in the Fund.

Shareholder Information

Valuing Fund Shares

The Fund's net asset value ("NAV") per share, is generally calculated each day the NYSE is open for trading as of the close of regular trading on the NYSE, generally 4:00 p.m. Eastern time. The NAV per share is computed by dividing the net assets of the Fund by the number of Fund shares outstanding. The prices at which creations and redemptions occur are based on the next calculation of NAV after a creation or redemption order is received in an acceptable form. The time at which shares and transactions are priced and until which orders are accepted may vary to the extent permitted by the Securities and Exchange Commission and applicable regulations.

Shares of the Fund may be purchased through a broker in the secondary market by individual investors at market prices which may vary throughout the day and may differ from NAV.

On holidays or other days when the NYSE is closed, the NAV is not calculated and the Fund does not transact purchase or redemption requests. Trading of securities that are primarily listed on foreign exchanges may take place on weekends and U.S. business holidays on which the Fund's NAV is not calculated. Consequently, the Fund's portfolio securities may trade and the NAV of the Fund's shares may be significantly affected on days when a shareholder will not be able to purchase or sell shares of the Fund.

Investments are valued pursuant to valuation procedures approved by the Board of Trustees. The valuation procedures permit the Advisor to use a variety of valuation methodologies, consider a number of subjective factors, analyze applicable facts and circumstances and, in general, exercise judgment, when valuing Fund investments. The methodology used for a specific type of investment may vary based on the circumstances and relevant considerations, including available market data. As a general matter, accurately fair valuing investments is difficult and can be based on inputs and assumptions that may not always be correct.

The Fund generally values portfolio securities and other assets for which market quotes are readily available at market value for purposes of calculating the Fund's NAV. In the case of equity securities, market value is generally determined on the basis of last sale prices, or if no sales are reported, on quotes obtained from a quotation reporting system, established market makers, or independent pricing vendors. In the case of fixed income securities and non-exchange traded derivative instruments, fair value is generally determined using prices provided by independent pricing vendors. The prices provided by independent pricing vendors reflect the pricing vendor's assessment using various market inputs of what it believes are the fair values of the securities at the time of pricing. Those market inputs include recent transaction prices and dealer quotations for the securities, transaction prices for what the independent pricing vendor believes are similar securities and various relationships between factors such as interest rate changes and security prices that are believed to affect the prices of individual securities. Because many fixed income securities trade infrequently, the independent pricing vendor often does not have as a market input, current transaction price information when determining a price for a particular security on any given day. When current transaction price information is available, it is one input into the independent pricing vendor's evaluation process, which means that the price supplied by the pricing vendor may differ from that transaction price. Short-term fixed income investments having a maturity of 60 days or less are generally valued at amortized cost, which approximates fair value. Exchange-traded options, futures and options on futures are generally valued at the settlement price determined by the relevant exchange.

When reliable market quotations or prices supplied by an independent pricing vendor are not readily available or are not believed to accurately reflect fair value, securities are generally priced at their fair value, determined according to fair value pricing procedures adopted by the Board of Trustees. The Fund may also use fair value pricing if the value of some or all of the Fund's securities have been materially affected by events occurring before the Fund's pricing time but after the close of the primary markets or exchanges on which the security is traded. This most commonly occurs with foreign securities, but may occur with other securities as well. When fair value pricing is employed, the prices of securities used by the Fund to calculate its NAV may differ from market quotations, official closing prices or prices supplied by an independent pricing vendor for the same securities. This means the Fund may value those securities higher or lower than another given fund that uses market quotations, official closing prices or prices supplied by an independent pricing vendor. The fair value prices used by the Fund may also differ from the prices that the Fund could obtain for those securities if the Fund were to sell those securities at the time the Fund determines its NAV.

Buying and Selling Shares

The Fund issues and redeems shares only in Creation Units at the NAV per share next determined after receipt of an order from an authorized participant. Authorized participants must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Transfer Agent, with respect to purchases and redemptions of Creation Units. Only authorized participants may acquire shares directly from the Fund, and only authorized participants may tender their shares for redemption directly to the Fund, at NAV. Once created, shares trade in the secondary market in quantities less than a Creation Unit.

These transactions are made at market prices that may vary throughout the day and may be greater than the Fund's NAV (premium) or less than the Fund's NAV (discount). As a result, you may pay more than NAV when you purchase shares, and receive less than NAV when you sell shares, in the secondary market.

Shareholder Information

If you buy or sell shares in the secondary market, you will generally incur customary brokerage commissions and charges and you may also incur the cost of the spread between the price at which a dealer will buy shares of the Fund and the somewhat higher price at which a dealer will sell shares. Due to such commissions and charges and spread costs, frequent trading may detract significantly from investment returns.

The Fund may impose a creation transaction fee and a redemption transaction fee to offset transfer and other transaction costs associated with the issuance and redemption of Creation Units of shares. Information about the procedures regarding creation and redemption of Creation Units and the applicable transaction fees is included in the Statement of Additional Information.

DISTRIBUTION AND SERVICE (12B-1) FEES

Harbor ETF Trust has adopted a distribution plan for the Fund in accordance with Rule 12b-1 under the Investment Company Act. Under its plan, the Fund is authorized to pay distribution and service fees to the Distributor for the sale, distribution and servicing of shares. No Rule 12b-1 fees are currently paid by the Fund, and there are no current plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because these fees are paid out of the Fund's assets on an ongoing basis, these fees will increase the cost of your investment in the Fund and may cost you more than certain other types of sales charges.

INVESTING THROUGH A FINANCIAL INTERMEDIARY

The Advisor and/or its related companies have in the past and could in the future pay intermediaries, which may include banks, broker-dealers, or financial professionals, for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems and data or other services related to the sale of Fund shares and related services, including making shares of the Fund and certain other Harbor funds available to their customers generally and in certain investment programs. Such payments, which may be significant to the intermediary or its representatives, are not made by the Fund. Rather, such payments are made by the Advisor or its affiliates from their own resources, which come directly or indirectly in part from fees paid by the Harbor fund complex. Payments of this type are sometimes referred to as revenue-sharing payments.

A financial intermediary may make decisions about which investment options it recommends or makes available, or the level of services provided, to its customers based on the payments or financial incentives it is eligible to receive. Therefore, such payments or other financial incentives offered or made to an intermediary create conflicts of interest between the intermediary (or its representatives) and its customers and may cause the intermediary to recommend the Fund or other Harbor funds over another investment. See the *Statement of Additional Information* for more information. Ask your sales representative or visit your financial intermediary's website for more information.

BOOK ENTRY

Shares of the Fund are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (DTC), or its nominee, is the registered owner of all outstanding shares of the Fund. Your ownership of shares will be shown on the records of DTC and the DTC participant broker-dealer through which you hold the shares. Your broker-dealer will provide you with account statements, confirmations of your purchases and sales, and tax information. Your broker-dealer will also be responsible for distributing income and capital gain distributions and for sending you shareholder reports and other information as may be required.

FREQUENT PURCHASES AND REDEMPTIONS OF SHARES

The Fund accommodates frequent purchases and redemptions of Creation Units by authorized participants and does not place a limit on purchases or redemptions of Creation Units by these investors. The Fund reserves the right, but does not have the obligation, to reject any purchase or redemption transaction (subject to legal and regulatory limits regarding redemption transactions) at any time.

SHAREHOLDER ACTIONS

With the exception of any claims under the federal securities laws, any suit, action or proceeding brought by or in the right of any shareholder or any person claiming any interest in any Fund shares seeking to enforce any provision of, or based on any matter arising out of, or in connection with, Harbor ETF Trust's By-Laws or Harbor ETF Trust or any Fund, including any claim of any nature against Harbor ETF Trust, a Fund, the Trustees or officers or employees of Harbor ETF Trust, shall be brought exclusively in the Court of Chancery of the State of Delaware to the extent there is subject matter jurisdiction in such court for the claims asserted or, if not, then in the Superior Court of the State of Delaware. Any suits, actions or proceedings arising under the federal securities laws shall be exclusively brought in the federal district courts of the United States of America. As a result of these provisions, shareholders may have to bring suit in an inconvenient and less favorable forum. There is a question regarding the enforceability of these

Shareholder Information

provisions since the Securities Act of 1933 (the “1933 Act”) and the 1940 Act permit shareholders to bring claims arising from these Acts in both state and federal courts.

INVESTMENTS BY REGISTERED INVESTMENT COMPANIES

Section 12(d)(1) of the Investment Company Act restricts investments by registered investment companies in the securities of other investment companies, including shares of the Fund. Registered investment companies are permitted to invest in the Fund beyond the limits of Section 12(d)(1), subject to certain terms and conditions, including the requirement to enter into an agreement with the Fund.

NOTE TO AUTHORIZED PARTICIPANTS REGARDING CONTINUOUS OFFERING

Certain legal risks may exist that are unique to authorized participants purchasing Creation Units directly from the Fund. Because new Creation Units may be issued on an ongoing basis, at any point a “distribution,” as such term is used in the 1933 Act, could be occurring. As a broker-dealer, certain activities that you perform may, depending on the circumstances, result in your being deemed a participant in a distribution, in a manner which could render you a statutory underwriter and subject you to the prospectus delivery and liability provisions of the 1933 Act.

For example, you may be deemed a statutory underwriter if you purchase Creation Units from the Fund, break them down into individual Fund shares, and sell such shares directly to customers, or if you choose to couple the creation of a supply of new Fund shares with an active selling effort involving solicitation of secondary market demand for Fund shares. A determination of whether a person is an underwriter for purposes of the 1933 Act depends upon all of the facts and circumstances pertaining to that person’s activities, and the examples mentioned here should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Dealers who are not “underwriters” but are participating in a distribution (as opposed to engaging in ordinary secondary market transactions), and thus dealing with shares as part of an “unsold allotment” within the meaning of Section 4(a)(3)(C) of the 1933 Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the 1933 Act.

This is because the prospectus delivery exemption in Section 4(a)(3) of the 1933 Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, you should note that dealers who are not underwriters but are participating in a distribution (as opposed to engaging in ordinary secondary market transactions) and thus dealing with the shares that are part of an overallotment within the meaning of Section 4(a)(3)(A) of the 1933 Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the 1933 Act. Firms that incur a prospectus-delivery obligation with respect to shares of the Fund are reminded that, under Rule 153 under the 1933 Act, a prospectus delivery obligation under Section 5(b)(2) of the 1933 Act owed to an exchange member in connection with a sale on an exchange is satisfied by the fact that the prospectus is available at the exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange. Certain Fund affiliates may purchase and resell Fund shares pursuant to this prospectus.

Shareholder and Account Policies

This Prospectus provides general tax information only. You should consult your tax adviser about particular federal, state, local or foreign taxes that may apply to you.

DIVIDENDS, DISTRIBUTIONS AND TAXES

The Fund expects to distribute all or substantially all of its net investment income and realized capital gains, if any, each year. The Fund declares and pays any dividends from net income and capital gains monthly. The Fund may also pay dividends and capital gain distributions at other times if necessary, to avoid federal income or excise tax. The Fund expects distributions, if any, to be from net investment income and/or capital gains. If you purchased your shares in the secondary market, your broker is responsible for distributing the income and capital gains distributions to you.

For U.S. federal income tax purposes, distributions of net long-term capital gains are taxable as long-term capital gains which may be taxable at different rates depending on their source and other factors. Distributions of net short-term capital gains are taxable as ordinary income. Dividends from net investment income are taxable either as ordinary income or, if so reported by the Fund and certain other conditions (including holding period requirements) are met by the Fund and the shareholder, as “qualified dividend income” (“QDI”). QDI is taxable to individual shareholders at a maximum rate of 15% or 20% for federal income tax purposes (depending on whether the individual’s income exceeds certain threshold amounts). More information about QDI is included in the Fund’s *Statement of Additional Information*. Dividends and capital gains distributions are taxable whether you receive them in cash or reinvest them in additional Fund shares.

Generally, you should avoid investing in the Fund before an anticipated dividend or capital gain distribution. If you purchase shares of the Fund just before the distribution, you will pay the full price for the shares and receive a portion of the purchase price back as a taxable distribution. Dividends paid to you may be included in your gross income for tax purposes, even though you may not have participated in the increase in the NAV of the Fund. This is referred to as “buying a dividend.”

When you sell Fund shares, you generally will realize a capital gain or capital loss in an amount equal to the difference between the net amount of the sale proceeds you receive and your tax basis for the shares that you sell or exchange. Character and tax status of distributions will be available to shareholders after the close of each calendar year.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gains distributions received from the Fund and net gains from redemptions or other taxable dispositions of Fund shares) earned by U.S. individuals, estates and trusts to the extent that such person’s “modified adjusted gross income” (in the case of an individual) or “adjusted gross income” (in the case of an estate or trust) exceeds a threshold amount.

If you do not provide your correct social security number or other taxpayer identification number, along with certifications required by the Internal Revenue Service, you may be subject to a backup withholding tax, currently at a rate of 24%, on any dividends and capital gain distributions, and any other payments to you. Investors other than U.S. persons may be subject to different federal income tax treatment, including withholding tax at the rate of 30% (or lower applicable treaty rate) on amounts treated as ordinary dividends or otherwise “withholdable payments” from the Fund, as discussed in more detail in the Fund’s *Statement of Additional Information*.

TAXES ON CREATIONS AND REDEMPTIONS OF CREATION UNITS

An authorized participant who exchanges securities for Creation Units generally will recognize a gain or loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of exchange and the sum of the exchanger’s aggregate basis in the securities surrendered and the amount of any cash paid for such Creation Units. An authorized participant who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger’s basis in the Creation Units and the sum of the aggregate market value of the securities received. The IRS, however, may assert that a loss realized upon an exchange of primarily securities for Creation Units cannot be deducted currently under the rules governing “wash sales,” or on the basis that there has been no significant change in economic position. Authorized participants exchanging securities for Creation Units or redeeming Creation Units should consult their own tax advisers with respect to whether wash sale rules apply and when a loss might be deductible and the tax treatment of any creation or redemption transaction.

Under current U.S. federal income tax laws, any capital gain or loss realized upon a redemption (or creation) of Creation Units held as capital assets is generally treated as long-term capital gain or loss if the shares (or securities surrendered) have been held for more than one year and as a short-term capital gain or loss if the shares (or securities surrendered) have been held for one year or less.

Shareholder and Account Policies

If you create or redeem Creation Units, you will be sent a confirmation statement showing how many shares you created or sold and at what price.

COST BASIS

The cost basis of shares acquired by purchase will generally be based on the amount paid for the shares subject to adjustments as required by the Internal Revenue Code. The difference between the selling price and the cost basis of shares generally determines the amount of the capital gain or loss realized on the sale or exchange of shares. The cost basis information for sale transactions is generally required to be reported to the IRS and the shareholders. You may elect to have one of several cost basis methods applied to your account and should consult with your tax adviser regarding your specific situation. You should contact your financial intermediary through whom you purchased your shares to obtain information with respect to the available cost basis reporting methods and elections for your account.
